

Official Oil of OSM

Legend Performance, makers of ZX2 and ZX2R became the Official Oil for OSM this winter. We're impressed with how clean burning this oil is and we've talked to technicians and mechanics in various shops who are quite happy with the results of these oils. Because of this, we went further and introduced Legend to our friends at the University of Waterloo who have been working on the 'clean air emissions program'. Having won international awards for their efforts, this group has gone on to use ZX2 and ZX2R oil in their field testing and along with other technology are convinced they can make a two-stroke engine as clean running as a four-stroke. OSM and Marketer Shows Inc. are proud to assist the 'Team' by putting them together with sponsors at the Toronto International Snowmobile, ATV & Powersport Show. Talk to them about their findings in their booth on October 21st, 22nd and 23rd, 2005 sponsored by Legend Performance. Distributed by Sled Pro Distributing and available at your local dealer.
